1 kg – 5 kg – 25 kg

Water-based, scented, **flooring detergent**, for manual use with mops only.

NEBULSAN

5 kg

Ready-to-use detergent for surfaces.

DILUTION TOOLS

SUGGESTED TOOLS TO PERFORM DILUTIONS

OPEN/CLOSE TAP FLUX REGULATOR

Thanks to the concentrated products plastic packaging are 90% reduced. Transports are optimized and their costs decrease remarkably.

GRADUATED BEAKER

The graduated beaker allows a perfect measure of the concentrated detergent to be used. It allows a perfect measurement of the quantity of concentrated product to be mixed with water inside buckets, bottles, triggers.

DISPENSING BOTTLE

You need just a little pressure on the bottle to fill the integrated doser, to get the right amount of concentrated detergent to be diluted in buckets, bottles and triggers.

DOSING PUMP

Connecting the water system to the dilution pump you can precisely mix water with concentrated product, directly from the canister. You have to only choose the appropriate nozzle (related to the %) to get the required percentage of needed detergent.

Thanks to the concentrated products plastic packaging are 90% reduced. Transports are optimized and its costs decrease remarkably.
