OVEN CLEANING

At the end of a working day, ovens must be cleaned to meet with hygienical standards and reduce wear and tear due to the potential corrosive substances left after the food cooking process.

To avoid the use of improper products that can be either too weak or too strong TIEFFE Chemical solving developed a range of cleaning products for the ordinary and extraordinary maintenance of its ovens.

USEFUL TIPS FOR EFFECTIVE CLEANING

- Wait until the cooking chamber is less 70° C - 80° C.
- Do not use high or low-pressure water jet to clean the appliance.
- Do not use sponges or abrasive cloths or objects such as scrapers to remove deposits.
- Remove all trays before start cleaning.
- Manually remove residues, and put the extractable parts

in the dishwasher.

- For manual cleaning of the oven, use only **FORNOLUX PLUS**.
- At the end of a manual washing, rinse all surfaces ensuring that all detergent traces are removed.
- For self-washing system use only: **OVEN SENSITIVE TAB**, **FLICK OVEN**, **SHINING OVEN TAB** and **OVEN LIQUID 2ACT**.
- To clean the external parts of the oven use a damp cloth with a mild detergent.

WHY TABLET DETERGENTS?

MAXIMUM SAFETY
Tablet detergents do not need any handling.

USER FRIENDLY
The lightness of the packaging reduces physical efforts during handling operations.

DOSAGE
The necessary cycle quantity of detergent is guaranteed by the pack unit avoiding possible mistakes.
